

Running Command

```
python serial_logger_datacollection.py
```

Environment

1. Please download python first
2. verify python is installed.

Please open the terminal

type down `python --version` or `python3 --version`, one of this should show some print outs.

3. Install the required libraries

```
pip install pyserial
```

or

```
python -m pip install pyserial
```

4. Save the python code in one folder. and open a terminal in that folder
5. You can start running now

```
python serial_logger_datacollection.py
```

Before running the code, please make sure the arduino is connected.
